The following seven departments of IHI Scube Co. Ltd. has achieved a Maturity Level 3 in the Capability Maturity Model			
Integration (CMMI®) – a global standard for assigning maturity and capability levels to software development processes:			
- Achieved in October 2022	Logistics System and FA Group, Digital Solution Division (Digital Solution Group, Service Solution Center)		
- Achieved in March 2019	Business System Group, Business Solution Division (Business System Group, Business Solution Center)		
	Design Technology Group, Enterprise Solution Division (Energy Infrastructure Group, Engineering Solution Center)		
- Achieved in March 2018	Energy and Plant Engineering Group, Business Solution Division (Energy Infrastructure Group, Engineering Solution Center)		
	Aero-Engine and Space Design Information Group, Advanced Solution Division (Design System Group, Engineering Solution Center)		
	Global Engineering Group, Enterprise Solution Division (Design System Group, Engineering Solution Center)		
- Achieved in March 2017	CAD Product Engineering Group, Enterprise Solution Division (Design System Group, Engineering Solution Center)		

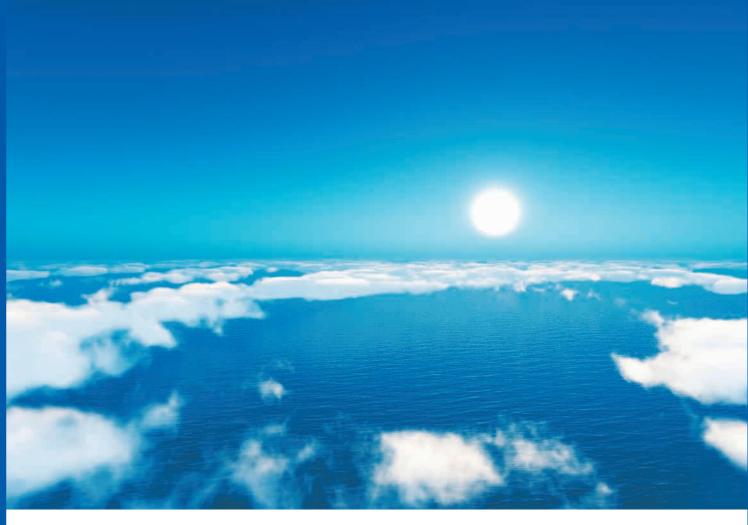

IHI Scube Co., Ltd. has obtained the following certifications as an organization.

CAT0001_20240401

IHI Scube Co., Ltd.

Corporate Profile

The Digital Technology Professionals of the IHI Group

Based on a management philosophy of "Contribute to the development of society through technology," since its establishment in 1853, the IHI Group has leveraged its engineering prowess focused on "Monozukuri" technology to roll out a diverse portfolio of businesses all aimed at providing solutions to social challenges. Over the past few years, the social environment has been changing significantly. An example of these changes is the evolution of business models and work style brought about by digital transformation (DX).

The IHI Group is also transforming its businesses with its sights set on the ideal vision for our future society. All of the group businesses share a common theme of "How can we leverage digital technology to the fullest to offer our customers and society new

> Business solutions

Solution

Capitalizing on the experience and know-how cultivated by the IHI Group, we offer comprehensive solution services across the entire product or service life cycle.

President & CEO Tada<u>shi Kato</u>

IHI Scube supports the development, operation and management of a wide range of systems, both administrative and technical. Our in-depth acquaintance with a broad range of businesses allows us to provide appropriate support for all needs from a front-line perspective. Making a relationship of trust with each customer our top priority, we thoroughly analyze the needs of our customers and pursue truly easy-to-use systems. Network Service solutions values?" As the IHI Group's digital professionals, we unite as one with the Group's business divisions in our efforts to achieve business transformation anticipating a new era.

IHI Scube adheres to our Code of Conduct focused on people, challenges, speed and appreciation. Drawing from the knowledge and experience we've obtained to date in the business areas of resources & energy, social infrastructure, industrial machinery, and aero & space, we will integrate the ever-evolving digital technology with the IHI Group's future businesses in order to solve the challenges our customers face and help society advance on the whole. In an age of rapid change, we must not passively wait for change to happen, but rather proactively welcome change as a group of professionals bursting with energy.

We also customers to expand their enterprises and constructing and designing systems that are rather than focusing on the individual scope provide support for implementing package business, including market expansion and products from major ICT vendors including regional control. SAP[®] and Microsoft

Network Service Solutions

IHI Scube realizes the ideal network environment for each customer through optimized proposals and reliable technologies to support their businesses. We provide a variety of services based on our extensive experience in construction, maintenance, and operation in the information and telecommunications field.

Additionally IHI Scube proposes and implements expertise extends to infrastructure construction, voice communication environments tailored to diverse needs, including collaboration environments fostering secure state-of-the-art infrastructure environments, leveraging and smooth cooperation with external partners and innovative technologies. This diverse array of services collaborators

availability while lowering TCO. Additionally, our systems, and the design, construction, and operation of forms a resilient backbone for both our clients' enterprises and the broader IHI Group ecosystem.

Engineering Solutions

By using ICT as an interface to link different areas of technology including PLM tools such as CAD/PDM, numerical analysis (CAE) and various IoT systems, IHI Scube provides one stop solutions that can be applied throughout the entire life cycle of products from implementation consultation and development to operation support.

CAD

IHI Scube provides a comprehensive array of analysis solutions – from commissioned structural, thermal and fluid analysis to design support tool development, and analysis consulting - that capitalize on the experience and knowhow in the analysis business that the IHI Group has cultivated in the field of manufacturing.

Providing one-stop support for all processes from implementation and customized development of 3D CAD/PDM systems to management of Bill of Material (BOM) and product information (technical data) in the Product Lifecycle Management (PLM) system, and provision of operational support

Supply Chain Solutions

IHI Scube's solutions dramatically improve cash-flow management environments by enhancing throughput and eliminating waste by resolving stagnation in the flow of goods and information. We help enhance the efficiency of our customer's business in all production and logistics processes by capitalizing on the experience and technologies cultivated by the IHI Group.

We offer tional status of equipment and devices. BOM, logistic, and inventory management. systems that contribute to addressing on-site

issues, such as enhancing work quality, improving productivity, and reducing costs.

IHI Scube offers AWS and various other cloud computing necessary resources on-demand, minimizing initial investment and eliminating reliance on physical locations.

PLM (CAD/PDM)

Manufacturing equipment such as robots and machine tools are an integral part of the manufacturing process. Factories can be transformed into smart factories by using ICT to manage the operation status of equipment and collect processing information, and using the stored data to manage and analyze processes.

work process, and to implement the optimal personnel and inventory allocation
