IHI *Realize your dreams*

President & CEO
Tadashi Kato

The Digital Technology Professionals of the IHI Group

Guided by our management philosophy, "Contribute to the development of society through technology," the IHI Group has been addressing social challenges since its founding in 1853 by leveraging its engineering capabilities centered on Monozukuri, the art of manufacturing. Even in this era of rapid and significant change, our philosophy remains unchanged. We continue to pursue our business activities with the vision of creating a world where nature and technology work in unity.

In recent years, the advancement of digital technologies, including artificial intelligence, has been transforming the way we conduct business and work. The use of digital technology serves as a driving force for creating new value for society and offers an opportunity to enrich the future. IHI Scube has long supported the growth and development of the IHI Group through the application of information and communication technologies. The technical expertise and human talent we have cultivated over the years are

among our most valuable assets. Since our founding, we have cherished our Code of Conduct, which focuses on People, Challenge, Speed, and Appreciation. Building on this philosophy, we will continue to combine the assets we have developed with the latest digital technologies to achieve further growth.

As the digital technology professionals of the IHI Group, we at IHI Scube are working together with the Group's business divisions to drive transformation toward a new era, solve our customers' challenges, and contribute to the advancement of society. In an age of rapid change, we must not passively wait for transformation to come but proactively embrace it as a group of professionals filled with energy and determination.

Business Solutions

Our rich lineup of business support software supports various aspects of business, including mission-critical systems for finance, sales, and human resources. We offer systems and services tailored to your needs, from business improvement consulting to implementation support and after-sales service.

Engineering Solutions

By using ICT as an interface to link different areas of technology including PLM tools such as CAD/PDM, numerical analysis (CAE) and various IoT systems, IHI Scube provides one stop solutions that can be applied throughout the entire life cycle of products from implementation consultation and development to operation support.

Network Service Solutions

IHI Scube realizes the ideal network environment for each customer through optimized proposals and reliable technologies to support their businesses. We provide a variety of services based on our extensive experience in construction, maintenance, and operation in the information and telecommunications field.

Supply Chain Solutions

IHI Scube's solutions dramatically improve cash-flow management environments by enhancing throughput and eliminating waste by resolving stagnation in the flow of goods and information. We help enhance the efficiency of our customer's business in all production and logistics processes by capitalizing on the experience and technologies cultivated by the IHI Group.
